### Advanced Leadership Institute April 29 and 30, 2010

This advanced institute will empower teachers to rise to the creative challenge of identifying and serving many forms of giftedness. Participants will learn and share new strategies and techniques for using the Shared Inquiry™ method. Work with great teachers, leaders of gifted education, and members of the adult Great Books community to take your Shared Inquiry skills to the next level. After the institute concludes, a weekend of cultural events and literary discussions begins!

This is an opportunity to recharge your teaching, take part in lively discussions and cultural activities with other Great Books lovers, and gain professional development graduate credits.
